Office Action Summary

Art Unit: 2834

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7 and 14, drawn to a piezoelectric resonator, classified in class 310, subclass 344.
- II. Claims 8-13, drawn to a method of manufacturing, classified in class 29, subclass 25.35.

The inventions are distinct, each from the other because:

Inventions group I and group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the resonator of group I can be made by methods other than those of group II, e.g. the connecting layer could be formed as a sphere, circle or irregular shape..

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
